QUICK START

The Calm 3-Step Method

You do not need a clever question. You only need to tell AI what you have, what you want, and how simple you want the answer to be.

1

Paste or describe the confusing information

Remove private details first, such as account numbers, full addresses, passwords, and medical IDs.

2

Ask for a simple explanation

Use one of the prompts below. Ask for short sections, bullet points, and plain English.

3

Ask what to check before acting

AI can help you understand, but important decisions should be checked with the original source or a trusted person.

Privacy pause: Before you paste anything into AI, remove personal details. You can replace them with words like [my name], [my address], [account number], or [doctor name].

PROMPT SET

“Explain This Simply” Prompts

Copy a prompt, add your text, and send it to your AI assistant. These are written to produce calm, useful answers instead of long technical explanations.

The simplest all-purpose prompt

Please explain this in plain English for someone who is not technical. Keep it calm and short. Tell me:

1. What this is about
2. What matters most
3. Anything I need to do
4. Anything I should check before I act

Here is the text:

[paste the text here]

When the text is too long

This is a long document. Please break it into simple sections. For each section, tell me:

- The main point
- Why it matters
- Any dates, costs, actions, or warnings
- Questions I should ask if something is unclear

Use short sentences and avoid jargon.

When you feel worried by the wording

This wording is making me feel worried. Please help me understand it calmly. Separate facts from possible concerns. Do not make it sound more serious than the text says. Tell me what I should check next.

When you only want the important parts

Please read this and pull out only the important details. I want:

- Key dates
- Money amounts
- Required actions
- Contact details
- Risks or warnings
- Anything that is just background information

WALKTHROUGHS

CHEAT SHEET

Jargon Translator

Jargon often makes simple things feel bigger than they are. Use this section to translate common phrases into plainer language.

Further action may be taken	They may do something else if the issue is not dealt with. Check what action and when.
Outstanding balance	Money they say is still unpaid.
Eligibility criteria	The rules that decide whether someone can apply or qualify.
Supporting documentation	Extra papers or proof they want you to provide.
Subject to approval	It is not guaranteed yet. Someone still needs to say yes.
Terms and conditions	The rules of the agreement. Look for costs, cancellation rules, and responsibilities.
Variable rate	A rate that can change, often meaning the cost could go up or down.
Clinical evidence	Research or medical information used to support a health claim. Ask where it comes from.

TRUST PROMPTS

“What Should I Check?” Before You Believe Or Act

AI can make things easier to understand, but it can still be wrong. These prompts help you slow down and check the parts that matter.

Check the source

- Who wrote or sent this?
- Is it from an official website or account?
- Can I contact the organisation directly?

Check the pressure

- Does it push me to act immediately?
- Does it use fear, urgency, or shame?
- Does it ask for money or private details?

Check the facts

- Are dates, prices, and names clear?
- Is there evidence for big claims?
- What would a reliable source say?

Trust check prompt

Please help me check this information carefully. Tell me:

- What parts are facts
- What parts are claims or opinions
- What details I should verify
- Any signs of pressure, urgency, or sales language
- The safest next step if I am unsure

Scam-safety prompt

Please look at this message for possible scam warning signs. Do not decide for me. Just list anything I should check, such as unusual links, pressure to act fast, requests for payment, requests for personal details, or wording that seems suspicious.
